Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Ayliffe et al. (U.S. 5,522,000).

See the Figure. Element 16a is a pad, which takes solder in a bumping process to secure an electrical component. Element 10 is a silicon layer, with a dielectric layer (element 14), which may be silica, on top of the silicon substrate, with pads 16b on top of the dielectric layer. The space between pads 16b and 16a forms a "U" shape. A groove is etched between pads 16b to hold an optical element. The edges of pads 16b, the dielectric layer, and the silicon substrate layer are aligned and form the sidewalls of the groove.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 13-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ayliffe et al. (U.S. 5,522,000).

In the event that the disclosure mentioned in the above rejection is not deemed an anticipation, it is the position of the examiner that the instant invention would have been obvious to one of ordinary skill in the art in view of the above mentioned disclosure. Variation in the exact shapes of the pads and etched grooves is taken to have been within the ordinary skill of the art depending on the shape of the optical and electrical elements to be secured to the substrate.

5. Applicant's arguments with respect to claims 13-29 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1772

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. This application contains claims 1-12 drawn to an invention nonelected with traverse in Paper No. 6, filed 20 April 2001. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
